

SWAIN'S PATENT KILN.—The attention of the above is drawn to a most valuable Invention in the manufacture of Kils, Drain Tiles, and all kinds of Pottery, consisting of a Kiln, constructed on Scientific Principles, to burn with one-third the quantity of Fuel at present required, and also in the arrangement of the same, to save the time of the Kilnmen, by the saving of both Fuel and Labour, to supply to the Consumer at a considerably Reduced Price, and realise a Larger Profit himself. Particulars may be obtained by application to Mr. CHARLES SWAIN, at the Works of the Glasgow and South Western Railway, to the Patentee, W. SWAIN, Brickmaker, Woomersley, near Leicestershire, where a Kiln can be seen in operation.
